

Fixes that pass your retest.

You audit. We fix the code. Your team retests. For auditors and audit firms that don't fix Shopify or WordPress theme code: your clients get fixes, and you keep the relationship, the retest and your independence.

Pay on pass

If the agreed fixes fail your retest, you don't pay for them.

- ☐ Each quote defines the pass criteria: the issue list, the WCAG version and success criteria, and the test environment and assistive technology.
- ☐ Up to two retest rounds. Failed items are reworked free within 14 days.
- ☐ Invoiced after the final retest, for the agreed fixes that passed. Payment terms: net 15.
- ☐ If no retest result arrives within the 10-business-day retest window, the delivered fixes count as passed.

Pay on pass is a payment term, not a compliance guarantee. It covers the agreed fixes, by the agreed date, without breaking the site, with a change log mapped to each audit item.

A change log built for your retest

One entry per finding, with your audit ID unchanged: the WCAG criterion, the files changed, what changed, how we verified it, the exact retest step, and its status.

Excerpt from our demo change log (fictional store)

KC-022 Cart drawer is not a dialog 2.1.1, 2.4.3, 4.1.2 (A)

Change Native modal dialog: focus moves in, Escape closes, focus returns to the opener.

Verified Scripted retest, keyboard task, virtual screen reader transcript.

Retest Add to cart by keyboard, press Escape, confirm focus is back on Add to cart.

Status Fixed, ready for retest.

Checked before it reaches you

Every template we touch is scanned before and after, at desktop and mobile widths (axe-core engine), diffed and mapped to your audit IDs. Then manual keyboard, VoiceOver, NVDA and 400% zoom testing, because automated tools catch only part of WCAG. Changes are made on staging or a duplicate theme only.

Your independence, protected

- ☐ The client can hire us directly while you retest, with no money between us.
- ☐ We don't pay referral fees to auditors.
- ☐ When we work from your audit, we never sell our own Review or Fix Watch to your client.
- ☐ No approaching your client for 12 months after a job without your written consent.

Retest three of our fixes first

For our first five partner firms, through December 18, 2026: send one client's audit and we quote within 2 business days. Pick three findings and we fix them on staging first, so you can retest our work on your client's real code. No charge for the three unless you go ahead.

Not ready? Send three findings with the client's details removed for a free fix plan within 1 business day.

What we never promise

Lawsuit dismissal, protection from future lawsuits or demand letters, or blanket legal compliance (ADA, Section 508, EAA, or any law). Not included unless the quote lists it: the audit itself, checkout on non-Plus Shopify stores, third-party app internals, catalog content such as product alt text, and more than two retest rounds.

Next step: send one client's audit at tabstopstudio.com/contact, or email everest@tabstopstudio.com.
